

The federal government should not implement a proposal that would lessen the Indiana Telephone Privacy Law. The law has increased my undisturbed quality family time with my child. I would get 12-20 unwanted calls per week and now I receive 1 or less. The way I understand the proposal you are making it would more or less make my phone number fair game for anyone who thought I was a customer. If I were still a customer they would not have to call me. Please do not over ride our state law it is working wonderfully. If I were you I would set up the federal law to match ours. It has been working for sometime and why reinvent the wheel. Or in other words if it's not broken don't fix it. Thank you for your time in considering my views.
